Box made of isolating Sandwich material, powder-coated (inside white, outside silver)

Ball head coupling with safety indicator for optimised brake functionality even in critical situations

Massive rear portal made of aluminium profiles, doors can be opened separately (angle up to 270°), special locking system with emergency opening from the interior.

Recyclable shockproof thermoplastic mudguards

A-frame safety drawbar directly connected to the longbeam chassis - optimised allocation of the tractive forces.

Four massive telescopic prop stands for a maximum weight of 6000kg, adjustable through a telescopic tube and a spindle for the fine adjustment

### **Inside the Trailer**

Equipped with an internal light (220 Volt), switchable from the display on the outside.

Equipped with an aluminium treadplate skirting board, 250 mm high.

Double wooden floor, insulated, slip-resistant coating

### **Long beam chassis for optimized driving and safety**

Massive long members and cross members form a strong chassis that was especially developed for our refrigerated trailers.

Telescopic stands are mounted on high-sized tubes that are directly connected to the chassis. The weight is allocated through the chassis to the stands - no strain for the box construction.

The stands can be fitted to all kinds of grounding with the help of a telescopic tube and a spindle adjustment.
